

Scope of Conference

Recent advances in science and technology have created new opportunities and a foundation for both theoretical and practical sciences. However, certain conditions are required for the creation of knowledge. Knowledge media should be used to communicate these contexts and integrate technology and learning theories to provide informative environments for students with various academic, administrative, and support requirements. NCEHST-2022 strives to provide a forum for researchers to discuss the state of science and technology in business, academia, and other organizations. This conference emphasizes on the nation-wide needs and research efforts to meet the UN's sustainable development goals and aims to bring forth eccentric solutions and platforms for young researchers to contribute in such efforts.

Conference Background

Academic conferences are held to present and exchange cutting-edge research frontiers, foster cross-cultural communication, and prioritize the well-being of mankind. The faculty of science and technology, UCP strives to excite the scientific community's interest in the broader scientific issues of today and tomorrow, and expand the understanding of our universe at all levels. The purpose of this national congress is to maximize the reach of different disciplines, including Biotechnology, Microbiology, Biochemistry and Chemistry, Zoology, Physics, Mathematics and Statistics, Food Science & Technology, and modulate the nation-wide efforts to achieve the UN-Sustainable Development Goals. Expert national speakers will demonstrate their insightful work on significant scientific questions and the participants will have a once-in-a-lifetime opportunity to learn from and interact with experts of different fields.
